

TALABAT QATAR - PERFORMANCE ANALYSIS

Q1 2026 REVIEW & FORECAST

CASE 2: RESTAURANT CHAINS

Month-over-Month Performance Analysis

By Bothwell Shumba

Executive Summary

As a Performance Analyst, I recommend 5 strategic focus areas to increase talabat Qatar's market share by +7.8 percentage points by the end of H1 2026. These recommendations are grounded in internal performance data (from Cases 1 & 2) and external market research, directly linking to order growth (+78,000 orders/month) and customer acquisition (+52,000 new customers).

Current State Analysis (Based on Case 1 & 2 Data)

Metric	Current Performance	Opportunity Gap
talabat Qatar Market Share (Estimate)	~55%	Target: 63% (+8 ppt)
Food Vertical Orders	336,797 (April peak)	Declining trend post-April
Grocery Fail Rate	22%	Should be <12%
Avg Delivery Time (Grocery)	42.3 min	Target: 30 min
Chains with >15% Fail Rate	8 chains (Brand B, O, Y2, V, I2, etc.)	18,000 recoverable orders/month
Activity Rate Range	1.2 - 2.3 orders/customer	Lift to 1.8 average

Top 5 Focus Areas for Market Share Growth

Focus Area 1: Fix Grocery Logistics Infrastructure

Aspect	Detail
The Problem	Grocery delivery takes 42.3 min (vs food 31 min), 17.5% late rate → 22% fail rate. Customers cancel when perishables arrive late.
External Data	Qatar e-grocery market growing 18% CAGR (RedSeer 2025). 68% of customers abandon cart if delivery >45 min (Statista).
Proposed Solution	Dedicated grocery fleet, 30-min delivery guarantee, real-time tracking, temperature-controlled packaging.
Order Growth Impact	Reduce fail rate 22% → 12% → +8,000 orders/month
Customer Growth Impact	Retain 5,000 existing customers + acquire 3,000 new → +8,000 net customers
Market Share Impact	+0.8 percentage points
Timeline	Weeks 1-6 H1 2026

Rationale for Market Share Growth: Grocery is the fastest-growing segment in Qatar food delivery. Competitors like Snoonu and Carrefour Now are winning with faster delivery. Fixing this directly captures their share.

Focus Area 2: Launch Q-Commerce (15-Minute Delivery)

Aspect	Detail
The Problem	Competitors offer 15-min delivery on essentials. talabat's 42-min grocery delivery is losing the premium, high-frequency customer segment.
External Data	GCC q-commerce market to hit \$6B by 2027 (McKinsey). 45% of users prefer platforms with <20min delivery. Qatar's internet penetration: 99% (WeAreSocial 2025).
Proposed Solution	Establish 5 dark stores in high-density Doha areas (West Bay, The Pearl, Al Sadd, Lusail, Education City). Stock 2,000+ essential SKUs.
Order Growth Impact	Capture premium segment → +15,000 orders/month
Customer Growth Impact	Acquire 10,000 high-income, time-sensitive customers → +10,000 net customers
Market Share Impact	+1.5 percentage points
Timeline	Weeks 4-12 H1 2026

Rationale for Market Share Growth: Q-commerce is the future of delivery. First-mover advantage in Qatar's underpenetrated 15-min delivery market will capture share from competitors before they scale.

Focus Area 3: Introduce "talabat Plus" Subscription Loyalty Program

Aspect	Detail
The Problem	Activity rate is volatile (6x to 10.6x in April). No loyalty mechanism to retain customers post-promotion. Customer churn is high.
External Data	talabat Pro (UAE) has 35% higher retention. Amazon Prime members spend 4.6x more. Qatar ARPU is \$1,058 (Statista 2025). 45% of users would pay for delivery subscription.
Proposed Solution	"talabat Plus" - 5/month or 50/annual. Benefits: free delivery (>\$10 orders), 5% cashback, exclusive discounts, partnered with Ooredoo & CBK rewards points.
Order Growth Impact	Convert 20% active users (6,000 subscribers) → each orders 3x more → +12,000 orders/month
Customer Growth Impact	Lock in 6,000 high-LTV customers + reduce churn by 25% → +6,000 net customers
Market Share Impact	+1.2 percentage points
Timeline	Weeks 6-10 H1 2026

Rationale for Market Share Growth: Subscription models create switching costs. Once customers pay for talabat Plus, they're less likely to order from competitors. This builds a defensible moat

Focus Area 4: Optimize Underperforming Restaurant Chains

Aspect	Detail
The Problem	Bottom 20% of chains (Brand B: 24% fail rate, Brand O: 22%, Brand Y2: 26%, Brand V: 20%, Brand I2: 19%) are dragging talabat's brand reputation and losing customers.
External Data	Exclusive partnerships drive 40% of delivery market growth (Uber Eats strategy report). Customer NPS drops 15 points after a failed delivery experience.
Proposed Solution	Tiered commission structure: 18% for chains with <10% fail rate, 25% for >20% fail rate. Provide free logistics audit, driver training, and route optimization for underperformers.
Order Growth Impact	Improve bottom 5 chains to 15% fail rate → recover 18,000 lost orders → +18,000 orders/month
Customer Growth Impact	Recover 8,000 customers who churned due to bad experiences → +8,000 net customers
Market Share Impact	+1.8 percentage points
Timeline	Weeks 1-16 H1 2026 (ongoing)

Rationale for Market Share Growth: Every failed order is a lost customer to competitors. Fixing underperformers directly recovers market share. Happy customers become brand advocates

Focus Area 5: Hyperlocal Gamification & Viral Marketing

Aspect	Detail
The Problem	April's high activity (10.6x) suggests promotion-driven spikes, but sustainable engagement is missing. Social media presence is underutilized.
External Data	Gamification increases retention by 22% (HBR). Qatar's social media penetration is 99% with avg 7.8 hrs/day (WeAreSocial 2025). TikTok food content has 4x higher engagement than static ads.
Proposed Solution	"Order Streak": 7-day streak = free delivery, 30-day = \$10 credit Ramadan Campaign: Iftar family bundles + charity tie-in TikTok Integration: User-generated recipe challenges Referral Bonuses: \$5 for both referrer & friend
	• Tourism Campaigns: Partner with Visit Qatar for airport promos
Order Growth Impact	Increase activity rate 1.5 → 1.8 → +25,000 orders/month
Customer Growth Impact	Acquire 15,000 new via referrals + reactivate 5,000 dormant → +20,000 net customers
Market Share Impact	+2.5 percentage points
Timeline	Weeks 4-16 H1 2026 (peak during Ramadan & summer)

Rationale for Market Share Growth: Every failed order is a lost customer to competitors. Fixing underperformers directly recovers market share. Happy customers become brand advocates.

Total Impact Summary Table

Focus Area	Orders/Month Lift	Customer Growth	Market Share Gain	ICE Score	Priority
1. Grocery Logistics	8,000	8,000	0.80%	9.0/10	P0
2. Q-Commerce Expansion	15,000	10,000	1.50%	8.3/10	P1
3. talabat Plus Subscription	12,000	6,000	1.20%	8.7/10	P0
4. Chain Partnerships	18,000	8,000	1.80%	8.0/10	P1
5. Gamification Marketing	25,000	20,000	2.50%	7.7/10	P2
TOTAL	78,000	52,000	+7.8 ppt	-	-

ICE Score = (Impact + Confidence + Ease) / 3

Key Performance Indicators (KPIs) to Track

KPI	Baseline (April 2026)	Target (June 2026)	Measurement Frequency
Market Share %	55%	63%	Monthly (external data)
Total Orders	Current run rate	+78,000/mont h	Daily
Active Customers	Current base	52,000	Weekly
Grocery Fail Rate	22%	12%	Weekly
Avg Grocery Delivery Time	42.3 min	30 min	Daily
talabat Plus Subscribers	0	6,000	Daily
Activity Rate (All Verticals)	1.5	1.8	Weekly
NPS Score	Current	+15 points	Monthly survey

Conclusion

By executing these **5 focus areas** in H1 2026, talabat Qatar can:

- Increase market share by **+7.8 percentage points** (55% → 63%)
- Generate **+78,000 incremental orders per month**
- Acquire **+52,000 new customers**
- Deliver **\$11.7M in additional H1 revenue**
- Achieve **15-23x ROI** on implementation investment

Priority Action Items for Week 1:

1. Deploy logistics audit team to grocery operations
2. Identify top 5 underperforming chains (Brand B, O, Y2, V, I2) for immediate intervention
3. Begin dark store site selection in West Bay & The Pearl
4. Design talabat Plus subscription tiers & pricing
