

Case #1:

Our topline have been dropping. We need to deep dive into the top reasons why the orders are dropping and what are the main areas improvements on this metric in the next two quarters. Below is the past 4 months performance data for reference.

- If the trend continues, where will our performance be by the end of Q2 and Q3?
- Make some assumptions around what are the key drivers of failed orders for groceries? Pick what you think are the top contributors, and propose solutions (process/product) on how you would solve for those drivers.
- For each of the proposed solutions, quantify impact. Make assumptions around what inefficiencies fail rate drives, and how much your proposed solutions will improve order Counts.

Data sheet for the overall [here](#).

Case #2:

As a Performance Analyst, you're in charge of a presentation to explain the month on month performance of the top restaurants.

Please design the structure you'd put in place for this analysis. This structure should include (but not be limited to) an objective to the analysis, hypothesis, data points you would use and charts/visuals to present. Please send a powerpoint deck with 4-5 slides with a proposal for this analysis.

Data sheet for the restaurants [here](#).

Case #3:

As a Performance Analyst, you're in charge of increasing the Market Share % of talabat Qatar for H1 2026.

- What are the top 5 areas to focus on to guarantee the growth of market share of talabat Qatar?
- Please make sure you convey a solid rationale for your top 5 focus areas linked to direct implications on orders and customers acquisitions growth.

Feel free to use any external data points published online to answer these questions. Be as creative as possible!
